

Economic Development Queensland

OXLEY CONSTRUCTION UPDATE DECEMBER 2019

Economic Development Queensland (EDQ) is committed to keeping the community informed about the project on the site of the old Oxley Secondary College off Seventeen Mile Rocks Road.

As reported in our July 2019 construction update, in which we provided an update on the identification of subsurface Asbestos Containing Material (ACM), EDQ will be carrying out additional site investigations in the week beginning 9 December 2019. Please note, in its current state, the subsurface ACM presents no risk to the community, including the childcare centre.

This next phase of testing will follow the same program as per previous investigations already conducted with test pits and the installation of additional ground water monitoring wells across various parts of the site to finalise the remediation strategy.

The continuation of this testing will start on Monday 9 December 2019. EDQ expects this phase of testing to be completed by Friday 13 December 2019.

All remediation work will be undertaken by qualified professionals, as is best-practice, and in accordance with legislative requirements.
